## Mitigation Strategy(ies) for persons with relevant financial relationship(s)

### Mitigation steps for planners (choose at least one)

1. Divest the financial relationship
2. Recusal from controlling aspects of planning and content with which there is a financial relationship
3. Peer review of planning decisions by persons without relevant financial relationships (please complete the attached form)
4. Use other methods (please describe: \_\_\_\_\_)

### Mitigation steps for faculty and others (choose at least one)

1. Divest the financial relationship
2. Peer review of content by persons without relevant financial relationships (complete the attached form)
3. Attest that clinical recommendations are evidence-based and free of commercial bias (e.g., peer-reviewed literature, adhering to evidence-based practice guidelines)
4. Use other methods (please describe): \_\_\_\_\_

### Document the mitigation strategy(ies) used on the table below.

Name of Person	Role(s) in Activity	Step(s) Taken to Mitigate Financial Relationship	Date Implemented

### For peer reviewed mitigation, please answer:

Are recommendations for patient care based on current science, evidence, and clinical reasoning, while giving a fair and balanced view of diagnostic and therapeutic options?  Yes  No

Comments: \_\_\_\_\_

Does all scientific research referred to, reported, or used in this educational activity in support or justification of a patient care recommendation conform to the generally accepted standards of experimental design, data collection, analysis, and interpretation.  Yes  No

Comments: \_\_\_\_\_

Are new and evolving topics for which there is a lower (or absent) evidence base, clearly identified as such within the education and individual presentations?  Yes  No

Comments: \_\_\_\_\_

Does the educational activity avoid advocating for, or promoting, practices that are not, or not yet, adequately based on current science, evidence, and clinical reasoning?  Yes  No

Comments: \_\_\_\_\_

Does the activity exclude any advocacy for, or promotion of, unscientific approaches to diagnosis or therapy, or recommendations, treatment, or manners of practicing healthcare that are determined to have risks or dangers that outweigh the benefits or are known to be ineffective in the treatment of patients?  Yes  No
